

2022 MOTOR CONTROLS TRAINING

At NAE University we provide you with in-depth, hands on training that is designed for the beginner to the expert. The class will consist of a general overview and lab exercises of motor controls and their applications.

Our class will provide basic control programming training to in-depth product information and one on one time with our engineers that will be demonstrating how to solve complex issues in the field to give you the solutions for your applications.

2022 MOTOR CONTROLS TRAINING

Why should I attend?

NAE wants to provide our customers with product knowledge that will allow you to save time and money. The classes explain the fundamental concepts of selection, installation, trouble shooting and maintaining your motor control products and applications.

What will I learn?

In the Motor Controls training classes, you will learn:

1. Plant Tour

- Take a tour of the NAE warehouse, panel shop & engineering department to learn what all we have to offer and how it can help you.

2. NEMA Enclosure Review

- Learn about NEMA environmental ratings.
- Review our enclosures and the requirements needed for different applications.
- Review recommended operating temperatures for our pre-engineered panels.

3. Packaged Product Overview

- Review our pre-engineered packaged product offerings that cover everything from ATL Starters to VFD Panels, where you will learn about standard, washdown & irrigation panels and the proper applications for each.

4. Catalog review and exercises

- You will perform classroom exercises with our test stands to learn how to specify & price from our catalog, general & special purpose panels with options.

5. Basic Troubleshooting

- Learn hands-on basic trouble shooting skills with our engineers to limit issues incurred in the field.
